SUMMARY

I am a motivated student currently in my first year. I have a strong foundation in data manipulation, statistical analysis, and programming, with hands-on experience in Python and SQL. My skills include data literacy, data generation and collection, and analytical thinking. Adept at leveraging technical skills and analytical prowess to deliver high-quality, data-driven solutions. Seeking to combine passion for coding and data analysis in dynamic role as a Data Scientist and Data Analyst.

SKILLS

Python	NumPy
MySQL	Pandas
Django	SickitLearn
Power BI	Figma

KEY COMPETENCIES

Data Collection	Report writing and presenting	Strong interpersonal skills
Data manipulation	Critical thinking skills	Proactive and self-motivated
Data Visualization	Excellent communication skills	Exceptional organisational skills

PROJECTS

“Researched and analyzed multiple Dataset to create predictive model and diagnosis model using Scikit-learn, pandas, NumPy and Matplotlib”.

“Researched and developed a hospital management system using python to allow the hospital admin to verify and manage the records of patients & doctors”.

“Designed & collaborated on a group project to create a fully functional Venue booking website using Django, JavaScript, HTML, SQL and Bootstrap”.

*VS code

*GitHub

*MS Word to write report
